Roofing.

ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and chouser than any thing in use. The material forms a hard and smooth surface that will reast the action of the atmosphere in every climate. It is impervious to water, elastic, and fixible. It is impervious to water, elastic, and fixible. It contracts and expands with the changes of the a mos-

It contracts and exeands with the changes of the a mosphere, and will neither evaporate, crack nor rot; and, as to
its durability, there is an question.

It is practically imperishable, and will perfectfully resist
any ordinary external exposure to fire, as is abundantly
proved, and we will warrant it water-proof. We will engage to put our flooder an over ordinary good sheathing,
old stitudes, tar and gravet, tin, zinc, orpper, or iron roofs
—it making no difference how steep or flat they may be—
for seven dollars per one hundred square feet; it being far
cheaper than any Roof of the old style, and we are sure it
will give better autisfaction.

cheaper than any Real of the old style, and we are are at will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tarand gravel roofs, or around chiseneys, scottles, dormar windows, and gutters, where the tin is rust of through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roofs can be painted over (and warranted not to lette) at two dilars and fity cents. (and warranted not to leak) at two deliars and fifty cents per handred square feet, which is cheaper and much better than paint. This Roofing will be found to be the hear theng for covering large Roofs where they are exposed to for mach as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges. Dopots, Station Houses, Steamboat Docks, and, Is fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no chance for fire to communicate, and any light rubstance with hum out without igniting.

Ciscinsari, Jan. 7, 1857,
Having made considerable inquiry as to the merits of the
'Patent Elastic Cement Roofing," introduced into this city
by Childs & Co., I find it to be highly recommended in this by Chikis & Co., I find it to be highly recommended in this city by many excellent indges; that it is meeting with very ready and general introduction; that its superiority over the tar composition Roofing is decided and Ireely admitted, and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tim, but will try the virtues of the 'Patent Elastic Roofing" as a substitute.

Yours, truly,

With a piece of flancel, apply a small portion of the preparation very lightly, and the dirt will instantly disappear. It is the article used by the Kid-Glove Manufacturers of France to impart that purity of finish and softness for which their gloves are ro justly celebrated. It cleans kid slippers and white and colored kid-gloves elegantly. It is also an excellent article for the toilet and for beautifying the comlexion, removing tan, pimples, &c., far exceeds in excerence any of the thousand and one preparations usually old for that purpose. One trial, at the trifling expense of 25 cents, will convince any one that the article is all that it is claimed to be. Try a bottle of it for 25 cents, and you will never wish to be without it.
